

FROZEN YOGHURT

THE LATEST TREND!

NA9420 G

NA9328 G

As you've come to expect from Nissei, we keep up with the trends in the soft serve world. Our latest innovation: a new line of frozen yoghurt makers. These machines combine the usual excellent Nissei quality with a very high capacity, from 30 to 35 liters an hour.

For ideal convenience in making frozen yoghurt, the machines are constructed without a pump to make cleaning truly easy. The machines are perfect for fresh frozen yoghurt and can even pasteurize for long-life frozen-yoghurt mixes. The fresh, delicious look ensures a high turnover. You will definitely see your customers coming back for more!

Nissei machines are known for their high capacity, compact size, low-noise operation, low maintenance costs, long life span and ease of use. All machines come equipped with an energy-saving pasteurization system and require disassembly just once every 6 weeks.

THE ADVANTAGES OF A NISSEI TABLETOP FROZEN YOGHURT MACHINE

- Compact dimensions
- Air- or water-cooled
- Small upper tank ensures fresh product
- Large freezer cylinder for high capacity
- Unique 5-year guarantee on high-quality parts
- Suitable for self-service locations
